DETAILED ACTION

A request for continued examination under 37 CFR 1.114, including the fee set forth in 37 CFR 1.17(e), was filed in this application after final rejection. Since this application is eligible for continued examination under 37 CFR 1.114, and the fee set forth in 37 CFR 1.17(e) has been timely paid, the finality of the previous Office action has been withdrawn pursuant to 37 CFR 1.114. Applicant's submission filed on 4/3/03 has been entered.

Applicants' arguments, filed 4/3/03 and 9/5/03, have been fully considered but they are not deemed to be persuasive. Rejections and/or objections not reiterated from previous office actions are hereby withdrawn. The following rejections and/or objections are either reiterated or newly applied. They constitute the complete set presently being applied to the instant application.

Claims 63-65 are rejected under 35 U.S.C. 112, second paragraph, as being indefinite for failing to particularly point out and distinctly claim the subject matter which applicant regards as the invention.

Applicants have submitted new claims directed to modified recognition units as in claim 63 and cooperative function regarding binding affinities as in claim 64 and target vs. non-target specificity of binding as in claim 65. The metes and bounds of what comprises the TBA in these claims are unclear. For claim 63, the modifications that result in the decreased binding affinity appears to conflict and not be commensurate with TBA practice as cited on page 38, lines 9-11, of the specification. For claims 64 and 65 the targeting is not defined in relation to said page 38 citation and also appears

Art Unit: 1631

to lack commensurate description of the invention compared between said page 38 and claims 64 and 65. Clarification of the metes and bounds of the claimed invention is requested.

Claims 28, 57, 58, and 62 are allowed.

No claim is allowed.
